CONQUER UNCHARTED TERRAIN.

Available on

PREMIUM MODELS

- **HIGH MOUNTED AIR INTAKES:**

Ensures clean air reaches the engine and clutches run cool, enabling you to drive through marshes up to the seat base level.

- **HIGH-CLEARANCE ARCHED A-ARMS:**

Provides elevated capability delivering a wider 13 in. of ground clearance giving you the confidence and capability to navigate rocky, unyielding terrain.

- **SEALED ELECTRICAL COMPONENTS:**

Relocated fuse box higher on the vehicle allowing you to drive into the depths of marshlands without negatively impacting the electrical system.

- **POLARIS® PRO HD 4,500 LB. WINCH:**

Provides the power to pull and the confidence to roam with a factory-installed winch to remove trees and take on any terrain.

- **ACTIVE DESCENT CONTROL:**

Front wheels engage to use the entire driveline and transmission to provide maximum engine braking capability and superior descent control on steep terrain.

- **900W CHARGING SYSTEM:**

Turns horsepower into electrical power to support demanding applications and weather conditions without the fear of draining the battery. This high capacity charging system includes a 900W stator, flywheel and two regulators to produce 34% more power than the standard XP 1000.

- **BIGGER FRONT DRIVE:** A Larger front drive was put in to create a 20% stronger driveline.
